E. OVERRIDE/VALET SWITCH:

1. OVERRIDE FUNCTION:
The override/valet switch is used in case of an emergency, such as a lost or malfunction of the transmitter, you can still disarm the system. First turn the ignition switch on, within 10 seconds turn ‘on’ and ‘off’ the override/valet switch, the siren will stop and the system will be disarmed.

2. VALET MODE
If the vehicle is on maintenance or park in an area with parking attendants, the system will not ‘ARM’ with the switch on ‘valet mode’.

   a. To do so, turn the ignition switch on then within 10 seconds turn override/valet switch to ‘on’ position, the red led will turn on indicate the system in ‘valet mode’.

   b. Return to normal operation, turn ignition switch ‘on’ first then turn valet switch ‘off’.

Note: If the system is in ‘valet mode’, the transmitter still can lock/unlock the doors, dome light, parking light, headlight, channel 3, trunk release and panic function. No alarm function.

USING OPTIONAL PERSONAL OVERRIDE NUMBER:
Keep override re-arm wire loop: (Override re-arm off)
1. System armed open the door, the siren will sound.
2. Turn the ignition key on.
3. Turn valet switch ‘on’ then ‘off’ the siren will stop, and the system will be disarmed.

Cut override re-arm wire loop: (Override re-arm on)
To disarm:
1. Open the door, the siren will sound.
2. Turn the ignition key ‘on’
3. Turn the valet switch ‘on’ then ‘off’

Note: When finished above procedures, system’s siren stops alarming, parking lights stop flashing, other sensors stop triggering, but the vehicle can not start & drive away.

Enter override re-arm: (Re-arm timer 30 seconds)
The LED starts flashing, indicating the system entered override re-arm.

To cancel override re-arm:
Wait until LED flashes to your override re-arm number, then turn the ignition key off, to cancel override re-arm. You must make sure to turn the ignition key off at the correct number of times the LED flashes within 30 seconds. If not, the system will automatically re-arm.

Example: To cancel override re-arm using number 5 above, you would:
1. Open the door. Siren will sound.
2. Turn the ignition key ‘on’
3. Turn the valet switch ‘on’ then ‘off’
4. Wait until LED flashes 5 times, then quickly turn the ignition key ‘off’

F. PASSIVE ARMING
This system is equipped with an optional passive arming circuit. If you have chosen to have the system with passive arming, it will operate as follows:

1. Turn ‘off’ the ignition key.
2. Leave the vehicle, and close all entrances.
3. The LED status indicator will begin to fast flashing and the automatic arming timer will begin to count down.
4. Re-open the entrance and the LED will stop flashing.
5. Close the entrance, the LED starts flashing again.
6. The system will count down for 30 seconds, then the alarm will become armed.

NOTE:

a. Passive arming by-pass: When the system is in passive arming (LED fast flashing), you can press button II twice within 3 seconds on the transmitter to temporarily by-pass the passive arming. The short chirp will confirm this by-pass. Re-open the door, it will start the passive arming again.

b. The vehicle’s door will automatically lock immediately after passively armed.

H. ACTIVE ARMING: CH. 1

1. Press the arm/disarm button on the transmitter.
2. The siren will chirp once. After 3 seconds the system will be fully armed.

NOTE:

a. DEFECTIVE SENSOR REMINDER
   3 chirps indicates defective sensor occurred.

b. DELETE THE OPTIONAL DETECTOR:
   If the optional detector is connected. Press the button I on the transmitter. After 3 seconds after arming the alarm, the alarm will automatically delete the optional detector.

c. REMOTE HEAD LIGHT DELAY:
   Press arm/disarm button to arm, within 3 seconds press button II. The head lights will stay on for 30 seconds, lighting your way in the dark.
I. ACTIVE DISARMING: CH. 1
1. Press the arm/disarm button on the transmitter.
2. The siren will chirp twice to indicate that the alarm is disarmed.

NOTE: 
\[\begin{array}{l}
a. TAMPER DISARMING: \\
\quad If the alarm has been triggered, when you disarm the alarm, the siren will 
\quad chirp 3 times and the parking lights will flash 3 times and the LED will 
\quad indicate trigger mode.
\[b. SECURITY RE-ARMING: \\
\quad This alarm system is equipped with an automatic security re-arming circuit 
\quad that will return the alarm system to a fully armed state if the door is not 
\quad opened or the ignition is not turned on within 60 seconds after it is disarmed.
\end{array} \]

J. DOME LIGHT CONVENIENCE DELAY AND SUPERVISION:
The alarm with this unique feature will turn on your vehicle's dome light.
1. Upon disarming, the interior lights will remain on for 30 seconds.
2. If the vehicle is intruded, the interior lights will flash for the same duration as the siren.
3. The interior lights will remain on for 30 seconds, after the door is closed.

NOTE: Turning on the ignition switch or arming the alarm will turn off the dome light.

K. PANIC FUNCTION (Channel 1)
The transmitter can be used as a remote panic switch to manually trigger the alarm in case of an emergency. To do so, hold down the arm/disarm button on transmitter for over 3 seconds, the alarm siren will begin to sound and the parking lights flash. To stop panic alarming, press the transmitter once again it will disarm the panic alarming.

L. TRIGGER THE ALARM:
While the system is in an armed condition, opening the doors, hood, trunk or trigger the optional detector, the siren and parking lights will turn on alerting of an intrusion for 30 seconds. Then it will stop and automatically reset and re-arm. If one of the sensors or detectors are open, the alarm system will sound a maximum of three 30-second cycles.

NOTE: 1 WARN AWAY FEATURE:
Triggering the optional detector, a pre-warning audible tone from the siren and flashing parking lights, will warn away the intruder to turn back.
NOTE: 2 VOLTAGE DROP SENSOR AND OPTIONAL DETECTOR EXCLUSION:
If the voltage drop sensor or the optional detector (connected to 4 pin plug) is activated 3 times consecutively, the system will temporarily exclude the function of the sensor or the detector until you disarm the system. This is to prevent your vehicle false alarming when parked in a crowded area.

M. CAR JACKING FEATURE:
Warning: If you don't want to have a car jacking in this alarm system make sure to program this feature 'off'.

1. Each time when the ignition is turned on, the car jacking feature quietly arms 3-timer circuits.
2. Each time the ignition is turned 'on', the override switch must be turned 'on/off', to disarm car jack feature.

3-timer circuits will function as follows:
First timer: 50 seconds after the activation, the siren will start chirping for 10 seconds. During this 10 second period of chirping, you will be alerted to turn the valet switch 'on' then 'off', to turn off the car jacking feature.

Second timer:
60 seconds after the activation. The siren starts alarming and the parking light starts flashing continuously until turned off. You need to turn the ignition 'off-on' and the valet switch 'on-off' to turn off the car jacking feature.

Third timer:
90 seconds after the activation;
\[\begin{array}{l}
a. The ignition and the starter circuits will be disabled to prevent the vehicle from starting again.
\[b. The siren still alarming and the parking light flashing, and
\[c. It will remain active until the vehicle's battery power exhausted.
\end{array} \]

OVERRIDE THE SYSTEM TO TURN OFF ANTI CAR-JACKING:
Turn the ignition switch from OFF to ON, and within 10 seconds the valet switch On-Off, the siren will stop and the system disarmed
Note: If you use password pin code to double protect the vehicle security, you will need to use it to completely disarm the system.

N. IGNITION CONTROL POWER DOOR LOCK SAFETY SYSTEM.
Turn the ignition switch on and close all vehicle's doors. After 3 seconds, the system will automatically lock the central locking system.

O. TRUNK RELEASE CHANNEL 2 OUTPUT:
Press and hold button II of the transmitter for 2 seconds to trigger the trunk release or the 2nd channel output.

P. AUXILIARY CHANNEL 3 OUTPUT:
Pressing the transmitter button III will trigger the auxiliary 3rd channel output for as long as you hold.

Q. REMOTE CAR LOCATOR(CH.4): BUTTON IV
Press button IV to activate car locator function. The siren will chirp once, the parking lights will flash 12 times for easy location of your vehicle.

R. POWER ON ARM FEATURE:
Most alarms disarm when the car battery is disconnected and reconnected immediately. However, this alarm will be triggered. This is to prevent from stealing your vehicle once the alarm is disconnected and reconnected back. Setting the override/valet switch to 'on' position or turning the ignition switch 'on' will delete this feature.
